

HUMAN RESOURCE QUALITY MANAGEMENT

Panel Discussion

Helen Askim, Julie Fornshell, Kathy Hogan, Nancy Reis

Human resources provides services to policy makers, managers, and employees. The HR designee or department exists to serve the organization. HR is technical, legal, ever changing and dependent on good relationships. It interacts with every single person in the organization. HR crosses many boundaries and is both strategic and operational.

HR is the life blood of the organization because without it the body doesn't work. How do you know if HR is healthy in your organization? Does it need more exercise, better nutrition, or medication?

INTERNAL ASSESSMENT
